Comment button too far right smaller Phones
- CSS Styling problems
 - **Add Comment:**
More padding needed on the top of the AddComment Component.
(above text input).
 - **CommentList:**
When loading more comments you are scrolled down to the bottom of the page. This should not happen, load more should send you the button bar position.
- Firebase
 - **Lazy Load is inefficient:**
Lazy Load reloads previously loaded content
- Other

- **Routing:**
Routing is sometimes unreliable and will route you to empty pages or when going to another page the program crashes and between the stacks
- **LikedFromReddit:**
When a photo is liked from reddit the person that liked the post is not shown
- **FriendPage:**
When viewing another page memes will not show up in Grid View but are viewable in list view.
- **Following and Followers:**
Sometimes not reliable
- **Reacts:**
Cannot re-react to memes
Cannot react to memes without crashing
- **Comments:**
Sometimes after adding a comment it is not present in the list
- **LikedFrom:**
Sometimes doesn't have the same from
